REISSUE APPLICATION DECLARATION BY THE INVENTOR	Docket Number (Optional) 050355-0050
---	---

I hereby declare that:

Each Inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 5,807,640, granted September 15, 1998 and for which a reissue patent is sought on the invention entitled OPTICAL RECORDING MEDIUM REPRODUCING SYSTEM, METHOD OF REPRODUCING OPTICAL DISK, METHOD OF FABRICATING OPTICAL DISK ORIGINAL RECORD, AND ....

the specification of which

is attached hereto.  
 was filed on September 15, 2000 as reissue application number 09/664,434  
and was amended on July 13, 2005  
(If applicable)

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

by reason of a defective specification or drawing.  
 by reason of the patentee claiming more or less than he had the right to claim in the patent.  
 by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

When comparing the scope of the protection covered by the claims of the U.S. patent 5,807,640 with the technique actually used in the products that are being made, used and/or sold in accordance with the claims, although the basic idea is common, the actual detecting circuit may not be fully covered by the present claims since the claims do not positively define the shifting of an edge of selected pits in the track direction. Since, in an actual optical disk, the edge of selected pits are shifted in the track direction, it is intended add claims delineating that the edge of selected pits are shifted in the track direction to positively cover products that are actually being made, used and/or sold.

Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant.
